Milestone 5 – Design Presentation

Monday 11/25/19 during Lab Times

Part 1 Live Presentation: approximately 5 minutes

Times for presentation will be assigned and posted. Times will range from 9am to 4pm over the course of the normal lab times.

Location: TBA – Lab Room if not other room/rooms are announced

PDF of Presentation Slide Deck due 11:59pm on SUNDAY 11/24/19 to Gradescope (One submission per team) – This is the day BEFORE you make your presentation.

Your team's presentation should showcase:

- Project Idea
- Project Design – I/O Devices Used
- Project Design – Communication Used
- Project Design – Original work
- What worked
- What doesn't work
- Highlight process/team related roles

The first 2 slides of your presentation must be:
- Slide 1 MUST BE your Team Number and Team Member Names and NetIDs
- Slide 2 MUST BE your Project Name and Abstract (100 words)
HOWEVER! Do NOT read these first two "intro slides" during your presentation! Your introduction should be "Hi! We are Team X. Our Project Name is Y." Then move onto Slide 3.

Expect each slide to take between 30 seconds to 1 minute of "talk time" during your presentation. So 10 slides (plus the 2 intro slides) is probably too many. Having 5 to 7 slides is probably correct.

Your group must bring your own laptop with your slide presentation ready to go! This laptop might be connected to a monitor/projector at the start of your presentation. (Last time, the audience sat around a table/desk with the labtop.)

Your entire group is to arrive at least 20 minutes before your scheduled start time.

Part 2 Individual Evaluation of another Team's Presentation

Each person will also be required to give feedback on the presentation of one other group. Thus each person will be to be present during 2 presentations (their own group and that
 of one other group).
