

Milestone 6 – Demonstration of your Team Project

Demonstrations of your Team project will occur during lab time on

- Monday 12/2/19 during Lab Times 9am – 4:50pm

During your demonstration, make sure you highlight:

- Use of 2 external devices per person
- Use of 1 Arduino (or similar) device per person
- Some form of communication
- Original work done for your project

Your team **MUST** submit some .ino code to Gradescope **BEFORE** doing your demonstration. This submission should be done one time for the group and is to include/specify **ALL** members of your group.

The code your group submits **MUST** include a header comments section that contains:

- Your Team Number
- The Names and NetIDs of **ALL** the Team Members
- Your Project Name
- The 100 word Abstract for your project

Since the actual final .ino code for your project must be part of the Final Report, what you actually submit for this does not actually matter. However, we would like you to submit some .ino code related to your project **AND IT MUST CONTAIN THE COMMENTS AS SPECIFIED ABOVE.**

For the demonstrations done on 12/2/19 during the afternoon lab times (1pm and later), that Lab Time during which you are demonstrating your project must be the actual registered lab time for at least one member of your group.

This restriction will not be enforced for the lab times earlier in the day. So, it is expected that the earlier lab times will have fewer people trying to demonstration projects, so there will most likely be a quicker turn around for the labs earlier in the day.
